EDUCATION

Software Engineering & AI
CodeForAll
Nov 2025 – May 2026

B.Sc. Psychology
Univ. da Maia
2019 – 2023

PROFILE

Software engineer with a background in psychology and logistics, combining strong analytical thinking and communication skills with hands-on technical experience. Proficient in Java (OOP, MVC), full-stack web development, and WordPress / WooCommerce. Eager to grow within a high-performance engineering team and contribute to scalable, well-architected software.

EXPERIENCE

WordPress DeveloperJan 2026 – Present

Paiva Digital

—Development of institutional and e-commerce websites using WordPress and WooCommerce for multiple clients.

—Technical tutorial content (~1h per client) covering CMS and UI customisation.

—End-to-end project ownership from architecture to client handover.

Full Stack DeveloperJan 2026

Store Repair

—Designed and built a full e-commerce platform including architecture, UX-focused design, and core business integrations.

—Focused on performance, scalability, and modern web best practices.

Hardware & Software TechnicianJul 2025 – Jan 2026

Store Repair

—Fault diagnosis and repair of phones, computers, TVs, and appliances.

—Customer-facing technical support and repair follow-up.

Logistics Operations AdminFeb 2023 – Jun 2025

SPT Logistic

—Managed ADR and non-ADR goods using logistics software for stock control and shipment tracking.

—Coordinated with carriers and international clients for compliance and on-time deliveries.

Head BartenderJan 2020 – Feb 2023

Boite

—Led bar operations: stock management, team coordination, and workflow optimisation.

—Implemented improvements increasing efficiency, quality, and profitability.

PROJECTS

GLaDINATOR — AI Guesser
Java · REST API · JavaScript
Full-stack Akinator-style guesser (CodeForAll final project, team of 4). Binary question-narrowing algorithm with a GLaDOS-inspired personality.

Blackjack Card Counting Trainer
Java
Educational trainer implementing the Hi-Lo counting system, focused on game logic and OOP.

To-Do List App
Java · MVC
Task management app with MVC pattern, focused on clean architecture and OOP principles.

Student Grade Manager
Java
Grade management system demonstrating inheritance, abstract classes, polymorphism, and enums.
